MATT CORNELL

Matt Cornell is an Australasian based choreographer who grew up in Darwin, on Larrakia land. His work interrogates how we embody systems – social, cultural, political, or technological – and in turn how these systems embody us by forming communities and informing identities. His work takes multiple forms including dancing, performance, sound composition, writing, podcasting, and curation, in varying contexts including in theatres, galleries, public spaces, and online. Across these radically different contexts is the core notion of creating spaces, events, and experiences through which we can come together, to share something which might give rise to new ways to know ourselves and each other and the stories we tell ourselves. That we may get better at living together.
